> — JORDAN ANDRIAN

Jordan has owned and run three Jersey Mike's and now runs Blaze Pizza locations. After coming home from a long trip to a store where the checklists simply had not happened, he built a fix that pinged phones when tasks went undone. He was CrooHQ's first customer. Today it is one iPad system, built by an operator, for multi-unit fast-casual and QSR crews.

WHAT THEY DO

- Scheduling, punch clock and labor in one place
- Shift checklists with photo proof, cash logs, hiring
- Daily sales and labor dashboard with POS sync

WHO THEY SERVE

Multi-unit fast-casual and QSR operators, franchisees and independents who want to run the shift, not the spreadsheet.

PROCESS *repeatable systems that give owners their time back.*
